

Product Data Sheet

Admex 334F Polymeric Plasticizer

Product Description

Admex 334F is a polyester-type permanent plasticizer well-suited for critical uses where the PVC compound must be approved for food contact applications. *Admex 334F* has extraction and migration resistance superior to monomeric plasticizers suitable for these applications.

Typical Properties

Appearance	Light straw-colored liquid
Flash Point Closed Cup	230°C
Odor	Extremely low
Pour point	3°C
Refractive Index @ 25°C	1.4639 - 1.4669
Solubility in Water, @ 25°C	Negligible
Specific Gravity @ 25°C	1.078 - 1.084
Vapor Pressure @ 20°C	<0.1 mm Hg
Viscosity, Brookfield @ 25°C	3100 - 3800 cP
