

Akcrostab™ T-878

Product Description

Akcrostab™ T-878 is a complex sulfur-free organotin heat and light stabilizer containing no diluent or carrier.

Applications and Advantages

Akcrostab™ T-878 provides maximum clarity, brilliance and light resistance in calendered film and plastisols, particularly where quality is essential.

Excellent for use in premium grade garden hose, tubing and film, where water resistance is imperative.

Akcrostab™ T-878 completely eliminates plate-out problems in calendaring, extrusion and plastisol slush molding.

Typical Physical Properties

Form

Clear pale yellow liquid
