

Cata-Chek® 860

Stabilizer Product Profile

Product Description

Cata-Chek® 860 is a stannous octoate catalyst. It has been designed to provide rapid catalytic action in one shot or prepolymer type urethane reactions. Cata-Chek® 860 may be used in flexible and rigid foam formulations, as well as in urethane elastomers.

Cata-Chek® 860 can also be used in other applications where a stannous octoate catalyst is desired. Such areas include silicones and epoxy compounds.

Cata-Chek® 860 has been designed to resist oxidation during storage. While the package stability of Cata-Chek® 860 has been found to be outstanding, it is recommended that good handling procedures be practiced. Extended contact with air should be minimized whenever possible.

Safety and Handling

Complete toxicity and handling information can be found on the Material Safety Data Sheet, which is available on request.

Typical Properties

Physical State	Liquid
Specific Gravity (25°C)	1.265
Viscosity	450 cps.
Color (Gardner)	4
