Technical Data Sheet

Ribbed Smoked Sheet

Ribbed Smoked Sheet (RSS) is natural rubber that is visually graded for contamination from dirt, mold, blisters, bubbles, etc. It is graded based on a scale of 1-5, with 1 being the highest (best/most pure) grade available. It will typically exhibit higher molecular weight than technically specified rubber (TSR), which contributes to higher viscosity and higher strength, but may lead to more difficulty in mixing.

TYPICAL PROPERTIES

As described above, RSS does not have lab quantified or measured specifications, and is graded on visual appearance only. There can be slight differences in molecular weight/viscosity, fatty acid content, etc. based on location of production, smoking time and temperature, etc.

For assistance in selecting the right grade of natural rubber for your application, please contact the Harwick Standard Technical Department at 330-798-9300 or technical@harwickstandard.com
