

Synpro® Zincloid®

Product Description

Synpro® Zincloid® is a unique zinc stearate aqueous dispersion (20% zinc stearate) which provides optimum coating for rubber slab dipping processing and any other application requiring uniform coverage. This convenient pre-disposed product eliminates expensing dispersing equipment and dusty mixing operations for the end-user.

All dispersion products will settle (separate) over time without agitation. However, Synpro® Zincloid® should remain homogeneous for a least three (3) months at ambient temperatures. Should separation occur, adequate mixing will re-disperse the zinc stearate.

Safety and Handling

Complete toxicity and handling information can be found on the Material Safety Data Sheet (MSDS), which is available upon request.

Typical Properties

Appearance	White aqueous dispersion
Ash (ZnO)	13.6% Free
Fatty Acid	0.3%
Moisture (Water)	80.0%
Melting Point	122°C (ZnSt)
Apparent Density	8.5 pounds/gallon
Fineness (Sieve)	≥ 99% through 200 Mesh
