

Therm-Chek® CU 554-2

Stabilizer Product Profile

Product Description

Therm-Chek® CU 554-2 is a liquid zinc stabilizer for PVC plastisols.

Therm-Chek® CU 554-2 is recommended for use in plastisols. It can also be used in flexible PVC compounds. It works equally well in clear as in filled and pigmented systems. Therm-Chek® CU 554-2 provides good early color retention, good air release and good heat stability where heat sensitive pigments are used.

Recommended use levels in plastisols is 2-4 phr along with 3-5 phr or more Plas-Chek® 775 epoxy plasticizer. In flexible compounds, use at 0.5-2 phr, along with Plas-Chek® 775 epoxy plasticizer and secondary thermal stabilizers where needed.

Safety and Handling

Complete toxicity and handling information can be found on the Material Safety Data Sheet, which is available on request.
