

Therm-Chek® SP 1957

Stabilizer Product Profile

Product Description

Therm-Chek® SP 1957 is a barium powder PVC heat stabilizer which is used in the manufacture of extruded and injection-molded compounds. Therm-Chek® SP 1957 is effective in stabilizing high speed thin gauge, extruded vinyl compounds.

Therm-Chek® SP 1957 provides excellent processing time and allows for superior high temperature stability.

Therm-Chek® SP 1957 is recommended for use at 1.0 to 3.0 phr. The use of epoxy plasticizer will also enhance the stabilizing ability of Therm-Chek® SP 1957.

Safety and Handling

Complete toxicity and handling information can be found on the Material Safety Data Sheet, which is available on request.

Typical Properties

Physical state	Off White Powder
Density	0.3 1/cc
Specific Gravity	1.1
